Your answer

What is function?

Your answer

Difference between declaration a definition.

Your answer

Write a simple program with a main() function, and a user defined function to multiply two numbers.

Your answer

How many types of function. List out their name.

Your answer

General syntax of function definition.

Your answer

In case of large programs with thousands of code lines, \_\_\_\_\_ and editing becomes easier if you use functions

Your answer

Difference between call by value and call by reference

Your answer

If a function is to use arguments, it must declare variables that accept the values of the arguments. These variables are called the \_\_\_\_\_ of the function

Your answer

The function body contains the \_\_\_\_\_ and the statements(algorithm) necessary for performing the required task.

Your answer

Function statements to perform the task inside the \_\_\_\_\_.
