Open Elective from Other Departments

1. NOE-081: Non Conventional Energy Sources
2. NOE-083: Product Development

Departmental Elective IV

1. NTT-041 Mill Planning & Organization
2. NTT-042 Textile Marketing & Merchandizing

Departmental Elective V

1. NTT-051 Advance Weaving Technology
2. NTT-052 Technical Textiles

7th Semester B. Tech. Textile Technology

1. Open Elective- I from Other Department (L T P 3 1 0) credit =4

1.1 NOE-071: ENTREPRENEURSHIP DEVELOPMENT (L T P 3 1 0)

UNIT -I : Entrepreneurship- definition. growth of small scale industries in developing countries and their positions vis-a-vis large industries; role of small scale industries in the national economy; characteristics and types of small scale industries; demand based and resources based ancillaries and sub-control types. 5 Government policy for small scale industry; stages in starting a small scale industry. 2 (10)

UNIT –II: Project identification- assessment of viability, formulation, evaluation, financing, field-study and collection of information, preparation of project report, demand analysis, material balance and output methods, benefit cost analysis, discounted cash flow, internal rate of return and net present value methods. 8

UNIT –III: Accountancy- Preparation of balance sheets and assessment of economic viability, decision making, expected costs, planning and production control, quality control, marketing, industrial relations, sales and purchases, advertisement, wages and incentive, inventory control, preparation of financial reports, accounts and stores studies. 9

UNIT -IV: Project Planning and control: The financial functions, cost of capital approach in project planning and control. Economic evaluation, risk analysis, capital expenditures, policies and practices in public enterprises. profit planning and programming, planning cash flow, capital expenditure and operations. control of financial flows, control and communication. 9

UNIT –V: Laws concerning entrepreneur viz, partnership laws, business ownership, sales and income taxes and workman compensation act. 5 Role of various national and state agencies which render assistance to small scale industries. 2

Text / Reference Books:

1. Forbat, John, “Entrepreneurship” New Age International.
2. Havinal, Veerbhadrappa, “Management and Entrepreneurship” New Age International
3. Joseph, L. Massod, “Essential of Management", Prentice Hall of India.

1.2 Quality Management (NOE-072) (L T P 3 1 0) Credits = 4

UNIT-I : Quality Concepts: Evolution of Quality Control, concept change, TQM Modern concept, Quality concept in design, Review of design, Evolution of proto type.

Control on Purchased Product: Procurement of various products, evaluation of supplies, capacity verification, Development of sources, procurement procedure.

Manufacturing Quality: Methods and techniques for manufacture, inspection and control of product, quality in sales and services, guarantee, analysis of claims.

Total Lectures required =9

UNIT-II: Quality Management

Organization structure and design, quality function, decentralization, designing and fitting, organization for different type products and company, economics of quality value and contribution, quality cost, optimizing quality cost, seduction program.

Human Factor in quality: Attitude of top management, cooperation of groups, operators attitude, responsibility, causes of apparatus error and corrective methods.

Total Lectures required =9

UNIT-III: Control Charts, Theory of control charts, measurement range, construction and analysis of R charts, process capability study, use of control charts.

Attributes of Control Chart, Defects, construction and analysis of charts, improvement by control chart, variable sample size, construction and analysis of C charts.

Total Lectures required =9

UNIT -IV : Defects diagnosis and prevention defect study, identification and analysis of defects, correcting measure, factors affecting reliability, MTTF, calculation of reliability, building reliability in the product, evaluation of reliability, interpretation of test results, reliability control, maintainability, zero defects, quality circle.

Total Lectures required =9

UNIT -V: ISO-9000 and its concept of Quality Management, ISO 9000 series, Taguchi method, JIT in some details. **Total Lectures required =6**

Grand total of lectures required = 42

Text / Reference Books:

1. Lt. Gen. H. Lal, "Total Quality Management", Eastern Limited, 1990.
2. Greg Bounds, "Beyond Total Quality Management", McGraw Hill, 1994.
3. Menon, H.G, "TQM in New Product manufacturing", McGraw Hill 1992.

1.3 OPERATION RESEARCH (NOE-073) (L T P 3 1 0) Credits =4

UNIT-I: Introduction:

Definition and scope of operations research (OR), OR model, solving the OR model, art of modeling, phases of OR study.

Linear Programming: Two variable Linear Programming model and Graphical method of solution, Simplex method, Dual Simplex method, special cases of Linear Programming, duality, sensitivity analysis. **Total Lectures required =9**

UNIT-II : Transportation Problems:

Types of transportation problems, mathematical models, transportation algorithms,

Assignment: Allocation and assignment problems and models, processing of job through machines. **Total Lectures required =8**

UNIT-III : Network Techniques:

Shortest path model, minimum spanning Tree Problem, Max-Flow problem and Min-cost problem.

Project Management: Phases of project management, guidelines for network construction, CPM and PERT. **Total Lectures required =8**

UNIT-IV: Theory of Games:

Rectangular games, Minima theorem, graphical solution of $2 \times n$ or $m \times 2$ games, game with mixed strategies, reduction to linear programming model.

Quality Systems: Elements of Queuing model, generalized poisson queuing model, single server models. **Total Lectures required =9**

UNIT-V:

Inventory Control, Models of inventory, operation of inventory system, quantity discount., Replacement, Replacement models: Equipments that deteriorate with time, equipments that fail with time. **Total Lectures required =8**

Grand Total Lectures required =42

Text / Reference Books:

1. Wayne L. Winston, "Operations Research" Thomson Learning, 2003.
2. Hamdy H. Taha, "Operations Research-An Introduction" Pearson Education, 2003.
3. R. Panneer Seevam, "Operations Research" PHI Learning, 2008.
4. V.K.Khanna, "Total Quality Management" New Age International, 2008.

2. Open Elective from Other departments

2.1 NTT 701: Functional Clothing (L T P 2 0 0)

Unit 1: Definition of functional clothing, Classification of functional clothing, Functional finishes, ways to apply functional finishes on textile surfaces, Functional clothing market review

Unit 2: Functional Protective clothing: Nuclear biological Chemical protective clothing, extreme cold clothing; design, mechanism and applications, Fire retardant clothing, approaches to achieve fire retardancy in clothing, mechanism of fire retardancy, Soft and hard body armour , super thickening fluids (non-nutonean) for body armour, water proof beathable fabrics, ways to achieve waterproofness and breathability in textiles

Unit 3: Medical functional clothing: therapeutic and rehabilitative clothing, biosensing clothing, wound healing promoting dressings, antimicrobial sutures

Unit 4: Sportswear clothing: moisture management in sportswear, compression textiles, Aerodynamics, Spacesuit design and development, woven and knitted sportswear,

Unit 5: Cosmetotextiles: definition, classification, mechanism to develop various cosmetic effects in textiles, various cosmetoingredients, worldwide scene of cosmetotextiles, Smart Textiles, classification of smart textiles, Intelligent textiles, , mechanism of various types of smart textiles, Wearable electronics

Reference Books

1. Functional Finishes for Textiles: Improving Comfort, Performance and Protection (Woodhead Publishing Series in Textiles), Raushan Paul
2. Functional Textiles and Clothing, [G. Thilagavathi.](#), [M. Parthiban](#), [S. Viju](#)
3. Woodhead Publishing
4. Electronics in Textiles and Clothing: Design, Products and Applications [L. Ashok Kumar](#), [C. Vigneswaran](#), CRC Press
5. Smart Clothes and Wearable Technology, [J. McCann](#) (Editor), [David Bryson](#) Woodhead Publishing Series in Textiles

2.2 NTT 702: Clothing Science (L T P 2 0 0)

Unit 1: Definition of clothing comfort: importance of studying clothing comfort, various components and definition of clothing science, Brief introduction to the various processes related to comfort aspect: psychological, neurophysiological, physiological and physical, Psychology and Comfort: Psychological scaling, scales of measurement, wear trial technique, Aesthetic Comfort: General aspects, measurement of aesthetic properties, changes in aesthetic behavior

Unit 2; Neurophysiological basis of sensory perceptions: Perceptions of skin sensations related to mechanical stimuli: Dynamics of wear sensation, touch and pressure, prickle, itch and inflammation, roughness and scratchiness, Perceptions of sensations related to thermal and moisture stimuli: Fabric mechanical properties and tactile- pressure sensations: Fabric prickliness, fabric itchiness, fabric stiffness, fabric softness, fabric smoothness, roughness and scratchiness, fabric hand

Unit 3: Thermal Conductivity of Fibrous Materials: Various parameters and related factors that affect the thermal conduction through fibrous materials like fibrebatts, nonwoven fabrics, pile fabrics, woven and knitted fabrics, thickness, cover factor, fibre type, yarn structure, fibre morphology and shape, effect of fabric layers etc. Transient heat transfer mechanism (the warm-cool feeling): Kawabata's theoretical proposition of thermal diffusivity as an objective parameter for evaluation of warm-cool feeling, Hess's proposition of thermal absorbtivity as a more suitable parameter for the same purpose, Kawabata's instrument, Alambeta

Unit 4: Liquid Moisture Transfer through Fibrous Materials (Wicking and Water absorption): Theory of surface tension, theory of capillary action, wetting and wicking, interaction between liquid and fibrous materials, liquid spreading dynamics on a solid surface, Rayleigh instability, Lucas-Washburn theory, various theories and models on vertical and horizontal wicking through yarns, nonwoven fabrics and woven fabrics, absorption of water by a fibrous mass, objective measurement of wicking and absorption: angle of contact, droplet absorption test, vertical wicking, horizontal or transverse wicking tests

Unit 5: Transfer of moisture vapour through Fibrous Materials: Diffusion of vapour through a porous medium, various modeling approaches, moisture vapour permeability of fabrics, influence of various fabric parameters such as thickness, cover factor, etc. on the moisture vapour permeability, measurement of moisture vapour permeability, International standards.

Reference Book

1. Science in Clothing Comfort Apurba Das, R. Alagirusamy, Woodhead Publishing India Pvt Limited, 2010 - Technology & Engineering - 175 pages
2. Improving Comfort in Clothing edited by Guowen Song Woodhead Publications
3. Textiles for Cold Weather Apparel, J. Williams Woodhead Publications

3. NTT-703: Advance Spinning Technology (L T P 3 1 0) Credits =4

Unit-1: Open-end spinning processes, advantages and limitations of open-end spinning process. Rotor spinning- Objectives of rotor spinning, Mechanism of yarn formation on rotor spinning, Opening unit and yarn formation, Design of rotor, navel and yarn withdrawal tube.

Total Lectures Required = 8

Unit-2: Yarn characteristics and comparison of yarn properties with ring yarn, wrapper fibres, Rotor and ring yarn structure Effect of rotor variables and fibre properties on rotor spun yarns, Limitations of rotor spinning. **Total Lectures Required = 8**

Unit-3: Friction spinning- Principle, DREF-2 and DREF-3, yarn formation , yarn quality, yarn structure, fibre specifications for optimum results, merits & limitations, end use of friction spun yarn. **Total Lectures Required = 9**

Unit-4: Air jet Spinning-Principle, concept of false twist, Murata jet spinning, operation principle, Raw material requirement, Effect of process variables on yarn twist & tenacity, yarn quality, structure, properties and end uses of air jet spun yarns, limitation of air jet yarns.

Total Lectures Required = 9

Unit-5: Production of sewing thread, fancy yarns, core spun yarns, Tyre cord yarns, SIRO spinning, Electrostatic spinning, end uses of these yarns, merits & limitations.

Total Lectures Required = 8

Grant Total of Lectures Required =42

Reference Book-

1. NCUTE Series
2. The technology of short staple spinning- W. Klein
3. Spun Yarn technology- Eric Oxtoby
4. Spun Yarn technology, A. Venkatsubramani

4. Knitting Technology: (L T P 3 1 0) credits =4

Unit 1: Difference between knits and wovens, knitting terms and definitions (Course,, wale, stitch density) different type of knitting needles: bearded needle, latch needle, sinker, jack, cam arrangement, overlap, under lap, closed lap, open lap. **Total Lectures required =8**

Unit 2: Comparison of warp and weft knitting, Classification of weft knitting machine, elements of knitting machine like type of needles, sinkers, etc Needle numbering system, technology of loop formation, geometry of loop structure, Elements of loop structure: needle loop, sinker loop, relation between yarn count, machine gauge and stitch density. **Total Lectures required =9**

Unit 3: Classification of knit-structures, loop formation on: single jersey, Rib machines and inters look machines, socks knitting technology, Loop formation on flat bed machine
Total Lectures required =9

Unit 4: Four primary base knitting structures: Plain knitted fabric, Rib fabric, Interlock and Purl fabric, Special knitting machines: Fabric machine, garment length machine, flat machine, circular machine fabrics and Spacer fabrics. **Total Lectures required =7**

Unit 5: Basic warp knitting machines, classification of warp knitting, Modern developments in weft knitting technique, calculations regarding production, gsm, stitch density etc, Causes and remedies of faults of knitted fabrics. **Total Lectures required =9**

Grand total of lectures required = 42

Reference and Text Book-

1. Knitting Technology – Chamberlin
2. Knitting Technology – W.J. Spencer
3. International Textile Journal – Knitting
4. Knitting Calculation – Chamberlin
5. Wet Knitting Vol. 1&2 –Published by IIT New Delhi.
6. Knitting – NCUTE
Laboratory work: As per Lab Syllabus

5. Departmental Elective (L T P 3 1 0)

5.1 NTT 031 Garment Manufacture Technology (L T P 3 1 0)

Unit (1): Introduction to garment manufacturing technology, Sample cutting, Fusing, Sewing, Pressing, Finishing and inspection, Line balancing concept. **Total Lectures required =8**

Unit (2): Introduction to measurement of fabric dimensional properties, fabric comfort, thermal comfort, objective evaluation of fabric, low stress fabric properties, Kawabata system, fabric assurance by sample testing, fabric defects, Fabric inspection and feedback to back process.

Total Lectures required =9

Unit (3) Introduction to garment cutting, Marker planning, Efficiency of Marker planning, methods of marker planning and marker use, spreading of the fabric, to form a lay, spreading requirements, methods of spreading, fabric packages, objective of cuttings, methods of cuttings

Total Lectures required =9

Unit (4): Introduction to seam, stitch, stitch classification, stitch structure, seam formation, joining material, surface characteristics, seam appearance, damages (thermal and mechanical), seam performance, seam degradation, seam failure, seam puckering and seam testing. Sewing needle and sewing thread, thread consumption

Total Lectures required = 9

Unit 5: Introduction of spreading machines and cutting machines- types and functions, History of sewing machines. Sewing machinery- classification according to bed types, stitch types (hook or looper) material wise (extra light to heavy weight). Major parts of sewing machinery and functions. Parts, functions and adjustments of Over Lock: Collar turning machines, folding machinery fusing and pressing machinery, Computer controlled cutting, sewing, folding machinery.

Total Lecture Required: 8

Grand total of lectures required = 42

Text Books and Reference material:

1. Introduction to Garment Manufacturing Technology By T Ramchandran
 2. Garment Manufacturing Technology by By T Ramchandran
 3. Practical Clothing Construction Part I & II by Mary Methews
- Laboratory work: NA

5.2 NTT 032: Process Control in Spinning & Weaving (L T P 3 1 0)

Unit (1): Importance of evolving a system for process control, control of mixing quality through fibre characteristics, simultaneous control of mixing cost and quality, concept of bale management. Control of waste in blow room and carding, norms for waste and cleaning efficiency in blow room & card, control of neps, assessment of performance of blow room & card, control of comber waste, concept of yarn realization, calculation pertaining to waste & yarn realization **Total Lectures required =9**

Unit (2) Measurement and analysis of productivity, means to improve productivity, maximizing machine efficiency in ring spinning, controlling end breakage rate in ring spinning, control of soft waste and hard waste, control of yarn faults and package defects- slubs, crackers, spinner's doubles, bad piecing & slough off.

Control of yarn quality- count, strength and their variability, study of CV% (within bobbin and between bobbin), control of variability of lea strength, single yarn strength and elongation %, Control of yarn unevenness, imperfections and hairiness.

Total Lectures required =9

Unit (3): Scope of process control in weaving, systems of process control in weaving, setting norms and schedule of checks, machinery audit, optimizing quality of winding, control of quality of knot, producing good package, dressing of the beams for reducing incidence of cross ends.

Total Lectures required =9

Unit (4): Process control in warping, minimizing end breakage in warping, quality of warping beam, control of productivity, factors responsible for loss in efficiency, control of productivity, Process control in sizing, choice recipe and size pick-up, control of size pick-up, control of yarn stretch, quality of sized beams. **Total Lectures required =9**

Unit (5): Process control in loom shed, snap study and time and motion study, control of warp and weft breakage, causes and remedies of fabric defects, factors responsible for loss in efficiency, control of productivity, process control in grey inspection, and folding sections.

Total Lectures required =9

Grand total of lectures required = 45

Reference Books

1. Machine catalogues of various machines manufacture
2. Process Control in Spinning by ATIRA
3. Process control in weaving by ATIRA
4. Process Control in Spinning by K.R. Salhotra
5. Weaving tablets by ATIRA

Lab Syllabus

NTT-754: Knitting Technology Lab (L T P 0 0 2) Credits =1

To study the path of yarn through circular and flat knitting machine, different knitting elements including the cam system, driving mechanism of plain knitting machine, cloth take-up mechanism of plain knitting m/c, rib knitting m/c including arrangement of dial and cylinder needles, cam, system and driving mechanism, Interlock knitting m/c including arrangement of dial and cylinder needle, cam system and driving mechanism, Warp knitting machine constructional details and mechanism of operation.

NTT-751: Project (L T P 0 0 8) Credits = 4:

Students will carry out minor project during seventh semester as a part of curriculum as per UPTU guidelines.

NTT-752: Industrial training Viva Voice (L T P 0 0 2) Credits = 2

Students shall carryout industrial training as a part of their curriculum after the completion of their 3rd year for one month. After this their performance shall be evaluated during 7th semester by taking viva of each and every student.

8th Semester **B. Tech. Textile Technology**

1. OPEN ELECTIVE-II

1.1 NOE-081: NON-CONVENTIONAL ENERGY RESOURCES (L T P 3 1 0)

UNIT-I: Introduction to various non-conventional energy resources- Introduction, availability, classification, relative merits and demerits. 3 Solar Cells: Theory of solar cells. solar cell materials, solar cell array, solar cell power plant, limitations. 4

UNIT-II: Solar Thermal Energy: Solar radiation, flat plate collectors and their materials, applications and performance, focussing of collectors and their materials, applications and performance; solar thermal power plants, thermal energy storage for solar heating and cooling, limitations. 9

UNIT-III: Geothermal Energy: Resources of geothermal energy, thermodynamics of geothermal energy conversion-electrical conversion, non-electrical conversion, environmental considerations. 4 Magneto-hydrodynamics (MHD): Principle of working of MHD Power plant, performance and limitations. 2 Fuel Cells: Principle of working of various types of fuel cells and their working, performance and limitations. 3

UNIT-IV: Thermo-electrical and thermionic Conversions: Principle of working, performance and limitations. 2 Wind Energy: Wind power and its sources, site selection, criterion, momentum theory, classification of rotors, concentrations and augments, wind characteristics. Performance and limitations of energy conversion systems. 6

UNIT-V: Bio-mass: Availability of bio-mass and its conversion theory. 2 Ocean Thermal Energy Conversion (OTEC): Availability, theory and working principle, performance and limitations. Wave and Tidal Wave: Principle of working, performance and limitations. Waste Recycling Plants. 3

Text/References Books:

1. Raja etal, "Introduction to Non-Conventional Energy Resources" Scitech Publications.
2. John Twideu and Tony Weir, "Renewal Energy Resources" BSP Publications, 2006.
3. M.V.R. Koteswara Rao, " Energy Resources: Conventional & Non-Conventional " BSP Publications,2006.
4. D.S. Chauhan,"Non-conventional Energy Resources" New Age International.
5. C.S. Solanki, "Renewal Energy Technologies: A Practical Guide for Beginners" PHI Learning. (14)

1.2 NOE 083- PRODUCT DEVELOPMENT

UNIT-1: Concept of Product, definition and scope. Design definitions, old and new design methods, design by evolution, examples such as evolution of sewing M/C, bicycle, safety razor etc., need based developments, technology based developments physical reliability & economic feasibility of design concepts.

UNIT –II: Morphology of design, divergent, transformation and convergent phases of product design, identification of need, Analysis of need. Design criteria; functional, aesthetics, ergonomics, form, shape, size, colour. Mental blocks, Removal blocs, Ideation techniques, Creativity, Check list.

UNIT –III: Transformations, Brainstorming& Synetics, Morphological techniques. Utility Concept, Utility Value, Utility Index, Decision making under Multiple Criteria. Economic aspects, Fixed and variable costs, Break-even analysis.

UNIT-IV: Reliability considerations, Bath tub curve, Reliability of systems in series and parallel, Failure rate, MTTF and MTBF, Optimum spares from Reliability considerations. Design of display and controls, Man-machine interface, Compatibility of displays and controls. Ergonomic aspects, Anthropometric data and its importance in design. Application of Computers in Product development & design.

UNIT-V: Existing techniques, such as work-study, SQC etc. for improving method & quality of product. Innovation versus Invention. Technological Forecasting. Use of Standards for Design.

Text/Reference Books:

1. A.K. Chitab& R.C. Gupta “Product design & Manufacturing” – Prentice Hall (EE)
2. R.P. Crewford, “The Technology of creation Thinking” Prentice Hall.
3. C.D. Cain, “Product Design & Decision” Bussiness Books.
5. C.D. Cain, “Engg. Product Design” Bussiness Books.

2. Theory of Textile Structure (NTT-801) (L T P 3 1 0) Credits =4

Unit (1): Classification of yarns, Yarn geometry- idealized yarn geometry, relationship of yarn number and twist factor, packing of fibres in a yarn, ideal packing, hexagonal close packing and radial packing, packing factor and its measurement, yarn diameter, method of measurement of twist contraction. **Total Lectures required =10**

Unit (2): Fibre migration: mean fibre position, amplitude of migration and frequency of migration, mechanism of migration, spinning-in coefficient and fibre extent. estimation of strength of blended yarn **Total Lectures required =6**

Unit 3: Mechanism of staple fibre yarns, translation of fibre properties into yarn properties, twist and strength relationship, limit of twist, spinability of textile fibres, relation with end-breakage rate. **Total Lectures required =9**

Unit (4): Elements of fabric geometry, cloth setting theories, flexible and rigid thread model, Pierce's equation and later modifications.

Total Lectures required =7

Unit (5): Relation of fabric properties to simple geometry, crimp interchange in woven fabric, crimp balance equation, Fabric cover, cover factor and their significance, relation between cover and weight per unit area of fabric, Theoretical treatment of fabric deformation in tension

Total Lectures required =10

Grand total of lectures required = 42

Text Books and Reference material:

1. Textile Yarn- B.C. Goswami, J.G. Martindale, F.L. Scardine
2. Textile structure- J.W.S. Hearle, S. Backer, Grossberg.
3. Pierce's geometry- Textile institute

3. Departmental Elective 4

3.1 NTT 041:- Mill Planning & Organization (L T P 3 1 0) Credits =4

Unit-I: Preparation of project—Spinning/Weaving/Processing/Composite

- A-** Selection of product
- B-** Site Selection (site, location, land and cost)
- C-** Building (single, double and multiple)
- D-** Plant and Machinery

Total lecture required 09

Unit-II

1. Industrial hazards: i. Fire hazards, ii. Mechanical hazards, iii. Electrical etc
2. Safety rules for prevention of accidents
3. Humidification of textile mill- humidifier and humidification
4. Ventilation, floor cleaning in textile mills, lightening
5. Air conditioning and Refrigeration system

Total lecture required 08

UNIT III:

Balancing of machine (plant layout for machines-- balancing of machines, layout of different machines, calculation for balancing of machines for different processes—spinning, weaving)

Total lecture required 07

UNIT IV

Production Costing—various terms used in costing (cost volume, profit analysis, cost allocation on waste, effect on cost direct , indirect

Various elements of costing- concept of estimation for costing, break-even analysis

Total lecture required 10

UNIT V

Economic Viability

Staff organization in textile mills – daily wages, various systems

Recruitment, allocation and skill development

Management and information system MIS

Total lecture required 08

Text Books & Reference Material

1. Industrial Engineering, Organization & management by Tarachand
2. Industrial Economics & Principle of Management by T.M. Chabra
3. Industrial Economics & Principle of Management by S. K Sharma

3.2 NTT 043:-TEXTILE MARKETING AND MERCHANDISING (L T P 3 1 0) =4

Unit 1: Introduction to Textile Marketing function; genesis, the marketing concept. Marketing Management System: objectives, its interfaces with other functions in the organisation. Environment of Textile Marketing, Political and Economic Environment, Market segmentation Consumer buying behaviour. Socio- cultural environment

Unit 2: Textile Marketing Strategy:- Marketing planning and Marketing programming. The concept of marketing mix, Product policy; the concept of textile product life cycle. New product decisions. Textile marketing and Pricing, Management of distribution: channels of distribution. Advertising and promotions. The concept of Unique Selling Proposition.

Unit 3: Implementation and Control. The marketing organization alternative organization structures; the concept of product management. Administration of the textile marketing programme: sales forecasting; marketing and sales budgeting; sales management; management of sales force. Evaluation of marketing performance; sales analysis; control of marketing effort; marketing audit

Unit 4: Jute textile sector, Silk textile sector, Man-made textile sector, Wool Textile sector, Statistics of Indian textile business (Domestic & Export) and World textile trade, Textile policy, World trade practices, norms, barriers, etc., Various pertinent prevailing issue impacting textile industry and trade, corporate social responsibility, ISO accreditation, etc., Retailing in textiles vis-a-vis consumer trends and behaviour and the challenges,

Unit 5: Textile Merchandising: Process of Planning, Purchasing, Motivating and Controlling of Materials in a optimum manner, vendor development, manufacturing, pricing, product design and development, exporting etc.

Reference Books:

1. Marketing Research A S Rao, Neha Publishers and distributors
2. Marketing: Connecting with Customers, Gilbert D. Harrell, Michigan State University ISBN-10: 0-9798304-7-1, Chicago Education Press, LLC.2012
3. **Pocket Textile Merchandising & Marketing Expert Hardcover – 2008** by Textile Industries Media Group
4. **Apparel Merchandising: The Line Starts Here, 2nd Edition** by Jeremy A. Rosenau , David L. Wilson, ISBN-13: 978-1563674488
5. Retail Merchandising Sapna Pradhan Tata McGraw Hill Education Private Limited 2009

4. Departmental Elective 5

4.1 NTT 051:- Advance Weaving Technology (L T P 3 1 0) Credits = 4

Unit (1): Principle of operation of shuttle-less loom, classification of shuttle-less looms, various systems of weft insertion, advantage of shuttle less looms over shuttle looms

Total Lectures required =8

Unit (2): Basic principle of sulzer projectile weaving, sequence of weft insertion i.e. weft supply system, feeding of yarn to projectile, Toggle-torsion bar picking mechanism, Cam driven shedding (dobby, card cutting, card reading, card wielding and card pasting), double cam beat-up, weaving machine timing advantages and limitations of sulzer looms, shuttle less weaving with more than one weft.

Total Lectures required =9

Unit 3: The rapier system of weft insertion, classification of rapier looms and its description, flexible and rigid rapier, tip transfer and loop transfer, weft control mechanism, loom timing

Total Lectures required =8

Unit (4): Working principle of air-jet weaving, essential requirements of shedding, sequence of weft insertion, weft measuring, weft tensioning, beating-up, weft gripping, weft cutting, weft stop motion and selvedge formation ,Problems in air-jet weaving machine, its remedies, design of nozzle, nozzle parameters affecting characteristics of air-jet, quality of air required, weaving machine timings, air drag force & factors affecting air drag force, blowing sequence of relay nozzles and timing control.

Total Lectures required =9

Unit (5): Water-jet weaving machine: principle of weft insertion, path of yarn on weaving machine, sequence of weft insertion i.e. weft supply system, feeding of yarn to main nozzle, picking mechanism, nozzle pump design, problems encountered, drying of fabric on weaving machine, quality of water required. **Total Lectures required =9**

Grand total of lectures required = 42

Text Books & Reference Material

1. Text Books and Reference material:
1. Modern development in weaving machine, by Duxburg
2. Weaving mechanism, machine and management, by Talukdar.
3. Weaving mechanism, by Robinson
4. Modern weaving preparation and machinery, by A. Ormerod
5. Woven terry fabric-manufacturing and quality management- Woodhead, JP Singh

4.2 NTT 052: Technical Textiles (L T P 3 1 0) Credits =4

Unit (1): Introduction to technical textile, types of technical textiles, textiles used in industry such as filtration, filter fabric construction- woven, needle felt & knitted filter fabric, finishing treatment of filter fabric, thermal and chemical properties of filter fabric, essential requirements of good filter fabric. Application of nano technology and nano materials for the improved filtration.

Total Lectures required =8

Unit (2): Manufacture and properties of protective textiles- water proof/coated and water repellent, antimicrobial, flame retardant, chemical resistance, Nuclear and biological resistance, mechanical resistance such as bullet proof, cut proof, stab proof

Total Lectures required =9

Unit (3): Medical textiles, fibres used, classification of medical textiles- non-implantable material wound dressings, bandages, plasters, etc, Extra-corporal devices – Artificial kidney, liver lung, implantable material- suture, soft tissue implant, Orthopedic implants, Cardiovascular implants, Healthcare/ hygiene products, medical cost, surgical gown, face mast etc.

Total Lectures required =8

Unit (4): Smart textiles, brief introduction of smart textiles, classification of smart textiles, passive smart textiles, active smart textiles, brief discussion of smart shirt, smart suit, musical jacket, space suit etc. automotive textiles: type cord, seat belt, air bag, seat upholstery, carpets, headliners, helmets etc, Agro textile: Shade net, green house film, Mulch net, crop cover, anti hail and bird protection net, finishing net etc.

Total Lectures required =9

Unit (5): Introduction of geo textile, classification of geo textiles, functions of geo textile-soil reinforcement, drainage (fluid transmission), filtration, separation, erosion control/ absorption, objective of geo textiles, manufacturing of geo textile, essential properties of geo textiles- Mechanical determinants, Hydraulic determinants, durability determinants

Total Lectures required =8

Grand total of lectures required = 42

Text Books and Reference material:

1. Hand book of technical textiles- A.R. Horrocks & S.C. Anand
2. Smart fibre, fabrics and clothing Tao X
3. Shears handbook of industrial Textiles.
